

SEISMIC6

NUTRITON FOR YOUR BRAIN

YOUR BRAIN IS A WORK IS PROGRESS

It is 'plastic.' From the day we're born to the day we die, it continuously revises and remodels, improving or slowly declining, as a function of how we use it.

Discover Better Brain Health

Discover The Working Ingredients Inside Seismic6

Seismic6 is designed to support healthy brain nutrition via cognitive nootropics in a great tasting drink...Don't let the package fool you, Healthy Energy Drink, this is in fact a **Healthy Brain Drink**, that also **energizes** your entire body!

Take a close look at the powerhouse **Brain Health Ingredients** that this drink has, I do not think you will find another brain health product like **Seismic6**, it truly is one of a kind!!

Plant Based Caffeine

Caffeine is the most widely used psychoactive drug in the world. As a nootropic, caffeine helps improve reaction time, alertness, memory and mood. Caffeine is an adenosine antagonist which influences acetylcholine, epinephrine (adrenaline), serotonin and boosts the use of dopamine.

Providing the stimulant effect experienced when consuming caffeine. Caffeine provides a protective effect by boosting gene expression of brain-derived neurotrophic factor (BDNF). Studies show chronic caffeine consumption may protect against developing neurodegenerative diseases like Alzheimer's and Parkinson's.

Caffeine improves mood within an hour of consumption. Because it increases the density of GABA receptors, potentiates dopamine, and causes some serotonin receptors to be more responsive.

Taurine

Taurine is one of the most abundant amino acids in your brain and body. And a featured ingredient in many popular energy drinks.

As a nootropic, *taurine* functions as a *neurotransmitter* and neuromodulator. It activates **GABA** and glycine receptors which affects your *mood and prevents seizures*.

Taurine is a neuroprotectant because it reduces intracellular free calcium, protects from *mitochondrial dysfunction*, modulates *energy metabolism* within cells, modulates *longevity genes*, inhibits *cellular*

stress associated with Alzheimer's, acts as a brain cell health "quality control" and *protects against stroke*.

And *Taurine* increases *stem cells* and progenitor cells in your brain which increases brain *cell survival and neurogenesis*.

Nitric oxide (NO)

Nitric oxide (NO) works as a retrograde neurotransmitter in synapses, allows the brain blood flow and also has important roles in intracellular signaling in neurons from the regulation of the neuronal metabolic status to the dendritic spine growth

How does nitrous oxide affect the brain?

Nitrous oxide causes the brain to release norepinephrine which inhibits pain signaling throughout the body. And finally, nitrous oxide increases stimulation to the pathway in the brain responsible for releasing dopamine, causing feelings of euphoria.

NO promotes better cerebral circulation and may prevent the "so called brain fog" or cognitive difficulties one may encounter when they have dysfunction of the autonomic nervous system. It is postulated that nitric oxide can even prevent more damage when a heart attack even occurs. It also may regulate cell death.

L-theanine

L-Theanine, which naturally occurs in green tea and oolong tea, is an amino acid. *L-Theanine* is used as a nootropic for anxiety, learning, mood, and focus.

Since it easily crosses the blood-brain barrier, L-Theanine works quickly to increase dopamine and serotonin. The "feel good" chemicals in your brain.

Experienced nootropic users often "stack" L-Theanine with caffeine for a synergistic effect to promote cognition, motivation and attention. As a bonus, the caffeine jitters are reduced when combined with L-Theanine.

Guarana Seed

Research has shown that guarana may improve your ability to learn and remember. One study looked at the effects of different doses of guarana on mood and learning. Participants received either no guarana, 37.5 mg, 75 mg, 150 mg or 300 mg.

People who received either 37.5 mg or 75 mg of guarana achieved the highest test scores. Since low doses of guarana provide low doses of caffeine, it's believed that other compounds in guarana aside from caffeine may be partially responsible .

Another study compared guarana to ginseng, another brain-boosting compound.

Although both guarana and ginseng improved memory and test performance, people who received guarana paid more attention to their tasks and completed them faster

Low doses of guarana can improve mood, learning and memory. Compounds in guarana, along with caffeine, are responsible for these effects.

Inositol

Inositol--Vitamin B8--has been found to reduce depression, hostility, tension and fatigue. Inositol--Vitamin B8--has been found to reduce depression, hostility, tension and fatigue. It is a folk remedy for anxiety and sadness.

Inositol affects the processes that make neurotransmitters, the molecules responsible for relaying information within your brain

Serotonin is one important neurotransmitter affected by inositol. This molecule has many roles in your body and impacts your behavior and mood..

Inositol, is a type of carbohydrate naturally found in the human body, along with particular foods and dietary supplements. It is also a nootropic that has been shown to decrease symptoms related to anxiety, depression, obsessive-compulsive disorder (OCD), mood swings, and panic attacks...

Inositol Can Help

– Inositol is used in your brain as a “secondary messenger”. It facilitates communication between brain cells. *All of your major neurotransmitters need inositol to relay messages.*

Neurotransmitters, neuromodulators and hormones have been shown to exert their action via an intracellular (inside the cell) secondary messenger system in which the activated neuroreceptor stimulates the turnover of inositol phospholipids.

Lower than normal levels of myo-inositol in middle-aged adults can signal the initial stages of cognitive decline such as Alzheimer’s and dementia.

Bovine Colostrum

Traditional health systems have long recognized that colostrum is a valuable tool for fighting premature aging. Colostrum is prized for its anti-aging and immune boosting qualities throughout Europe and in Indian Ayurveda.

Bio-Medicine reports, “Based on findings of a recent study researchers say that a mixture of peptides derived from colostrum could help slow the progression of Alzheimer’s disease by reducing the build-up of beta amyloid, a toxic protein that accumulates in the brains of Alzheimer’s sufferers.” The report went on, “In a double blind, placebo-controlled trial of 106 people with mild to moderate Alzheimer’s disease published last year it was found that after 15 weeks of taking the product in tablet form, around 40% of the patients were stabilized or had an improved overall response in tests on cognitive function. The greatest effects were seen during the earlier stages of the disease and no serious adverse events were observed during the trial.”

Researchers at the Department of Psychiatry, Wroclaw Medical University, Poland, say that a proline-rich polypeptide complex from colostrum “has shown positive effects in the treatment of Alzheimer’s disease (AD).”

The recently reported study found that Alzheimer’s patients taking tablets of colostrum rich in the complex experienced “statistically significant improvement or stabilization” of their health status. The colostrum-based

preparation is a "very promising preparation which can be used to retard the development of AD."

A study, published July 2009 in the Journal of Nutritional Health and Aging, demonstrated that neuronal cells pretreated with PRPs avoid the accumulation of beta-amyloid, toxic plaque that builds up in brains of Alzheimer's patients.

In the October 1, 2007 issue of Progress in Neuro- Psychopharmacology & Biological Psychiatry Dr A. Gladkevich of the Department of Psychiatry, University of Groningen, the Netherlands, took note of the growing body of work on PRP and observed, "The development of effective and safe drugs for a growing Alzheimer's disease population is an increasing need at present. Both experimental and clinical evidence support a beneficial effect of proline-rich polypeptides in a number of neurodegenerative diseases, including Alzheimer's disease.

Experimental data have shown that proline rich polypeptides isolated from bovine neurohypophysis possess neuroprotective and neuromodulatory properties in mice with aluminum neurotoxicosis or neuronal damage caused by venoms and toxins." Meantime, again it was stated PRPs "have been shown to produce cognitive improvement in an experimental model and in patients with Alzheimer's disease.

Note: Once you mix the Seismic6 Powder in water, you will notice the drink start to foam, that is the Bovine Colostrum, once it hits the water it becomes Bio-Active and the foam forms at the top of your drink... **That is the GOOD STUFF!!**

Ginseng

Ginseng can help prevent memory loss and mitigate age-related mental decline.

There's evidence that at least some of ginseng's cognitive-boosting power is due to its anti-fatigue effects.

This makes ginseng a good choice if you want an increase in mental performance and physical energy.

When Alzheimer's patients took ginseng root daily for 12 weeks, they experienced improved cognitive performance.

Ginseng increases circulation, sending more blood to all your organs.

This is why it's often taken for erectile dysfunction.

This same mechanism also increases blood flow to the brain.

A steady flow of blood delivers oxygen, glucose, vitamins, amino acids, minerals, and other nutrients that your brain requires.

Cerebral blood flow also carries away substances that your brain doesn't need such as carbon dioxide, toxins, and metabolic waste products.

Ginseng can help restore sufficient blood supply to the brain after a stroke or brain injury.

Ginseng can also increase brain-derived neurotrophic factor (BDNF), a protein that stimulates the growth of new brain cells.

BDNF also keeps existing brain cells healthy via a number of mechanisms. It increases brain plasticity, suppresses brain inflammation, acts as a natural antidepressant, offsets the negative effects of stress on the brain, and guards against neurodegenerative diseases.

Fucoidan:

Effects of fucoidan on brain disease. Fucoidan reduces inflammatory response in brain diseases by inhibiting microglial activation, thus resulting in significantly decreased neuronal and astrocyte degeneration due to diminishing production of pro-apoptotic agents and improving antioxidant responses of the cell.

New research has recently confirmed the marked effect of fucoidan on ageing-related processes.

Recent studies have revealed that it activates a key enzyme that influences lifespan called sirtuin 6. Sirtuin 6 is one of seven sirtuin enzymes that impact a range of cellular processes in humans, such as aging, telomere function and stress resistance.

Research has also demonstrated that fucoidan may promote vascular health, stimulate immune responses, and protect brain cells.

B-12

Vitamin B12 deficiency has been associated with memory loss, especially in older adults. The vitamin may play a role in preventing brain atrophy, which is the loss of neurons in the brain and often associated with memory loss or dementia.

Vitamin B12 can help improve brain fog by reducing stress and boosting mood. It can also improve poor memory and a weakened immune system. Vitamin B12 helps stabilize the function of the brain and boost your overall energy levels.

Vitamin B12 is involved in the function and development of the brain, nerve cells, the myelin sheaths that protect nerves, and blood cells. Vitamin B12 is sometimes taken to treat memory loss, poor concentration, and Alzheimer's disease and to boost your mood or energy levels.

Yerba Mate

Everyone wants to be smarter, more productive and focused. Yerba Mate will help. Containing a moderate amount of caffeine, Yerba Mate -enhancing benefits are well known. Yerba Mate helps to motivate by stimulating the production of dopamine, the body's natural "feel-good" neurotransmitter, which provides the "**sustained energy**" when doing something enjoyable.

Yerba Mate carries two related ingredients: theobromine and theophylline. All three work together to provide the unique stimulating effect of mate.

Yerba mate is a natural brain boost. While yerba mate does contain substances like caffeine that are common in coffee and tea to "sharpen" the brain and make it a little more active, yerba goes a little bit beyond that.

Huperzine A

Huperzine A, an extract of the Huperzia serrata plant, has been shown in studies to improve memory and learning from young students to seniors. Recent research shows that it improves memory and slows cognitive decline by increasing levels of acetylcholine, the compound that functions as a neurotransmitter in the brain. It's also been shown to help prevent neuronal cell death. Twenty randomized clinical trials involving 1823 participants indicated that it has a beneficial effect on memory, cognitive function, and quality of life.

NOOLVL

nooLVL® is a patented complex of Bonded Arginine and Silicon with an additional optimized dose of Inositol. **nooLVL** is a non-stimulant ingredient that boosts cognitive performance ...

Together, these compounds promote heightened cognitive function without the use of stimulants.

The biochemistry of **LnooLVL** is what makes this all so interesting. Instead of being a stimulant, or neurotransmitter, or even some magic mushroom, **nooLVL** is actually a vasodilator.* That's right. Initially created to help athletes increase blood flow and pump in the gym, **nooLVL** has been shown to increase blood flow around the body as well as the brain. The main ingredient is arginine bonded to a silicate with the addition of inositol. Arginine has been used as a blood flow enhancer for decades, but the problem has always remained that our gut contains an enzyme called "arginase" that breaks it down before it can enter the bloodstream. Thanks to the silicate, arginine can enter the blood and enhance a cycle that releases nitric oxide (NO). NO is used as a signaling molecule which causes blood vessels to relax, thus allowing for greater flow.

There's so much more we have to learn about how blood flow can enhance our cognition and working memory, but for now, it's exciting to learn that we can improve their ability to compete with such confidence. Seismic6 is one the first products on the market to use **nooLVL**...with other powerhouse ingredients.

Note: Gamers really love this ingredient.

Seismic6 is sold in powdered form in individual packets (30 day supply). Just mix with water and drink.

Seismic6 energy is formulated with our 6-hour colostrum manufactured in-house at our FDA, GMP certified production facility in Lehi, Utah. We source our pure, raw fucoidan from the Blue Zone of Okinawa, Japan. The functional herbs and botanicals come from different regions of the world. We source ingredients depending on their origin.

You can visit <https://18043.anovite.com/seismic6> for more information and pricing.

If you have any questions about **Seismic6** feel free to contact me, Bobby Brown, Independent Affiliate Anovite, bobbybrown5245@gmail.com

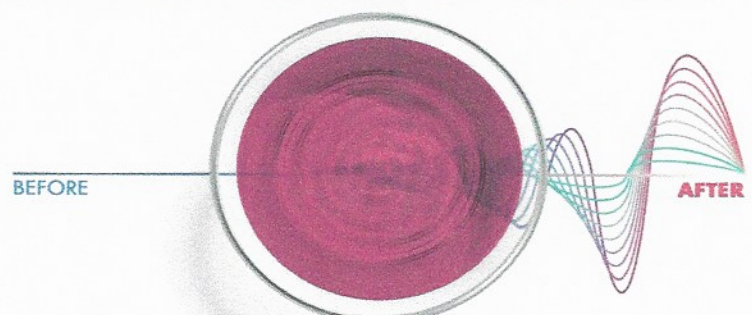

NUTRITION MEETS ENERGY

- PLANT-BASED CAFFEINE**
 - NATURAL CAFFEINE
 - GUARANA SEED
 - YERBA MATE
- BIOACTIVE SUPERFOODS**
 - COLOSTRUM
 - FUCOIDAN
 - COLLAGEN PEPTIDES
- COGNITIVE NOOTROPICS**
 - NITRIC OXIDE
 - INOSITOL
 - ARGININE
- SLIMMING BOTANICALS**
 - GINSENG
 - YERBA MATE
 - GUARANA

THE RIPPLE EFFECT

When taken daily, Seismic6 provides long term health benefits. Seismic6 has a powerful combination of ingredients focused on supporting your healthy diet and weight goals. Our signature marine & bovine superfoods, fucoidan & colostrum, support the body's thermogenesis to help maintain healthy diet goals. The slimming botanical blend uses cholesterol and lipid reserves to trigger a thermogenic burn. The hydrolyzed collagen peptide proteins promote fullness and keep your body feeling satisfied after a meal.

THE SEISMIC6 RIPPLE EFFECT

Feel the health benefits travel through your body like a shockwave and enjoy seismic waves of energy. When taken daily, Seismic6 provides more than just a healthy energy boost. It supports healthy weight, promotes brain function, and balanced body chemistry long-term. Enjoy first thing in the morning, as an afternoon pick-me-up, or as a pre-workout routine for that signature wave of energy.

PLANT-BASED CAFFEINE

200 mg of caffeine extracted from coffee beans, yerba mate, and guarana seed to provide you a natural mega-wave of energy.

NUTRITION FOR YOUR BRAIN

Cognitive nootropics feed your brain and keep you sharp. Supports neural activity, focus, and supports neurotransmitter function.

AMINO ACID FOR PRE-WORKOUT

Work out longer and harder with naturally occurring amino acids from taurine to increase muscle gains and protein synthesis.

BEAUTY-BOOSTING COLLAGEN

Support skin hydration and elasticity with hydrolyzed bovine collagen protein. Hello, healthy hair & nails.

SLIMMING BOTANICAL BLEND

This botanical blend combines yerba mate, guarana, and ginseng to promote balanced body chemistry and support healthy weight goals.

BIOACTIVE SUPERFOODS

Our signature bioactive superfoods, fucoidan & colostrum, support the body's adrenal system and your immune system.

Suggested Use:
Mix 1 packet of Seismic6 to taste with 8+ oz. of water. Recommend consuming immediately, or refrigerate after mixing.

NATURAL CITRUS TWIST

Supplement Facts

30 servings per container
Serving Size 1 Stick Pack (10.375 g)

Amount Per Serving		% DV*
Calories	40	
Sodium	35mg	2%
Total Carbohydrate	4g	1%
Total Sugars	1g	**
Protein	3g	6%
Calcium	108mg	8%
Potassium	115mg	2%
Vitamin B12	2,500mcg	104,170%

Seismic6 Blend	5.6g	**
Collagen Hydrolysate, nooLVL® (Inositol-Enhanced Bonded Arginine Silicate), Colostrum, Taurine, Theanine, Caffeine, Fucoidan, Ginseng Root Extract, Inositol, Yerba Mate Leaf Extract, Guarana Seed Extract, Arginine, Huperzine A.		

** Daily Value Not Established
* Percent Daily Values are based on a 2,000 calorie diet. The % Daily Value (DV) tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.

Other ingredients: Citric Acid, Malic Acid, Sunflower Lecithin, Natural Flavors, Cellulose Gum, Beetroot Juice Powder. Contains Colostrum with milk derived proteins.

noolVL® is a registered trademark of Nutrition 21, LLC
noolVL® is patent protected.

STORE IN A COOL DRY PLACE

Warning: Consume responsibly. Not recommended for children, pregnant or nursing women or people sensitive to caffeine.

*These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent disease.
